

Amir Balazade

Front-End Engineer

Istanbul, Türkiye · abalazade@gmail.com · linkedin.com/in/amirbalazade

Available for remote work

PROFESSIONAL SUMMARY

Front-End Engineer, **7+ years** across FinTech, Web3, B2B SaaS and e-commerce, on screens dense with tables and charts where a wrong number is noticed in seconds. A working app is not the finish line: implementation and core must hold. Comfortable turning a complicated business into features with product design and stakeholders, and drawn to R&D and AI work.

TECHNICAL SKILLS

Frameworks and languages: Angular, TypeScript, JavaScript, React, HTML, CSS

State and data: RxJS, NgRx, NGXS, Redux, state management, REST API integration, WebSockets, SignalR, WebRTC

Grids and charts: AgGrid, Highcharts, TradingView, charting

UI and design: design system, component libraries, Tailwind, PrimeNG, Angular Material, BEM

Web platform: PWA, service workers, SSR, SEO, web performance, cross-browser support, OIDC, responsive design

AI: prompt engineering, OpenAI API, Claude, tool calling, streaming responses, LLM chat interfaces

Testing, tooling and deploy: unit testing, Karma, Jasmine, Jest, Vitest, Git, GitHub, AWS

PROFESSIONAL EXPERIENCE

Front-End Engineer, Remorch Co. (FinTech, Blockchain, Web3)

Oct 2024 - Apr 2026

Full time, on site

- Built a mobile-first, non-custodial wallet PWA across **7 blockchains**, with per-chain signing, KYC and on-ramp integrations.
- Shipped **3 Angular and TypeScript apps**: the wallet, an admin panel, and a payment page with an **80 kB** initial download.
- Integrated REST APIs into secure workflows for digital assets, and presented the product at the company's Web Summit booth.

Front-End Engineer, Dara Broker Sedna Co. (FinTech)

May 2023 - Oct 2024

- Delivered an order management system with a cross-functional Agile team, pair programming daily with the desk.
- Streamed real-time data over SignalR into AgGrid, Highcharts and TradingView views for **5,000+ active traders**.
- Moved the charting libraries off the initial bundle, taking it from **5.1 MB to 1.9 MB** and first load from **6.4 s to 2.8 s**.
- Onboarded new joiners onto the stack and the brokerage domain, and ran knowledge-sharing sessions.

Front-End Developer, MyMonshi (CRM, VoIP, Cloud)

Oct 2020 - Sep 2022

Part time, hybrid, alongside university

- Developed a B2B SaaS CRM in React and Node.js, with in-browser WebRTC calls for **up to 6** and **no native client**.
- Led the R&D that chose the core stack, reworked the state store, and built secure cloud storage and real-time chat.

Front-End Developer, Rampart Co. (Virtual Tour)

Aug 2017 - Oct 2020

Part time, hybrid, alongside university

- Raised code quality across inherited React projects, and developed virtual tours for architectural projects.
- Contributed React work to an automation system that **cut 30% of the paperwork** between contractors and project managers.

SELECTED PROJECTS

zhambon.com

Apr 2026 - Sep 2026

- Designed and built an investment pool Angular PWA on NestJS and PostgreSQL, with **4 role-based domains**.
- Replaced the spreadsheet month end with CSV imports of broker exports and an accounting ledger, **saving 6 hours a week**.
- Added an AI assistant that answers from the fund's own data, using tool calling and streamed responses.

wordy.cards

Jan 2026 - Apr 2026

- Implemented FSRS-5 spaced repetition over 3,500+ German words, grading each card by the time taken to flip it.
- Made the PWA fully offline on IndexedDB, syncing progress in the background and fetching only changed lessons.

EDUCATION

Bachelor of Computer Science, Azad University, Science and Research Branch

2017 - 2022

LANGUAGES

English C1 (TOEFL iBT 100), German B1, Turkish A2
